Genetic Frontiers
Association of students and faculties of Genetics

ABBS, Genetics Association known as 'Genetic frontiers' intends to showcase the role of genetics in the advancement and betterment of society as a whole. The goal of this association is to highlight the latest advancement in this field. The aim is to spot light the impact of developments in genetics research in medical science, molecular diagnosis of diseases, pre- symptomatic detection and prevention of diseases, agriculture and plant biotechnology, animal breeding and animal biotechnology, evolutionary biology etc. It also means to invoke an appreciation of the dynamic and far reaching implications of genetic studies. It has active office-bearing members who coordinate the activities of the club. The club focuses on indulging students in academic oriented activities and has a practise of bringing a newsletter annually, with emphasis on current affairs in genetics field.
